Quan una de les crides té paràmetres a la ruta sempre s'han de posar aquests paràmetres sinó surt error. Per exemple, a /routesZones, http://localhost:3000/routesZones?

TranslationID="+idioma+"&ZoneID="+ruta no podries posar només http://localhost:3000/routesZones?TranslationID="+idioma"

### /routes

### Filtrar per rutes i idioma

var ruta = (agafar ruta) var idioma = (agafar idioma)

\$.get("http://localhost:3000/routes?
TranslationID="+idioma+"&RouteID="+ruta,function(data,status){});

### Es pot agafar

- De la taula routes: RoutelD, ZonelD, DifficultylD, ImgName, Likes.
- De la taula **zones:** ZoneName.
- De la taula difficulty\_translations: DifficultyName, DifficultyDescription.
- De la taula **zone times:** InitialDate, FinalDate.

## /routesZones

### Filtrar per zones i idioma

var zona = (agafar zona) var idioma = (agafar idioma)

\$.get("http://localhost:3000/routesZones?

TranslationID="+idioma+"&ZoneID="+ruta,function(data,status){});

#### Es pot agafar

- De la taula routes: routes.RouteID, routes.ZoneID, routes.DifficultyID ImgName, Likes.
- De la taula **zones:** ZoneName.
- De la taula difficulty\_translations: DifficultyName, DifficultyDescription.
- De la taula **zone times:** InitialDate, FinalDate.

### /comments

#### Filtrar per idioma

var idioma = (agafar idioma)

\$.get("http://localhost:3000/comments?TranslationID="+idioma,function(data,status){});

#### Es pot agafar

- De la taula **comments:** comments.CommentID, DatePublication, Likes.
- De la taula comment\_translations: Reply.

### /zones

## Filtrar per idioma

var idioma = (agafar idioma)

\$.get("http://localhost:3000/zones?TranslationID="+idioma,function(data,status){});

#### Es pot agafar

- De la taula **zones:** ZoneID, ZoneName.
- De la taula zone\_translations: ZoneDescription.

### /activities

### Filtrar per idioma

var idioma = (agafar idioma)

\$.get("http://localhost:3000/activities?TranslationID="+idioma,function(data,status){});

#### Es pot agafar

- De la taula **activities:** ActivityID, ActivityDuration.
- De la taula activity\_translations: ActivityTime, ActivityPrice, ActivityDescription
   ZoneDescription.
- De la taula **activity\_category\_translations:** CategoryName.

## /prices

#### Filtrar per idioma

var idioma = (agafar idioma)

\$.get("http://localhost:3000/prices?TranslationID="+idioma,function(data,status){});

#### Es pot agafar

- De la taula entrance\_prices: PriceID.
- De la taula **entrance\_price\_translations:** Price, PriceName, PriceDescription.

## /data forms

\$.get("http://localhost:3000/data\_forms,function(data,status){});

#### Es pot agafar

- De la taula data\_forms: DataID, DataName, Email, City, Phone, FormText.

# /images

## Filtrar per idioma

var idioma = (agafar idioma)

\$.get("http://localhost:3000/activities?TranslationID="+idioma,function(data,status){});

#### Es pot agafar

- De la taula images: ImagelD, ImageName.
- De la taula image\_translations: ImageAlt.

## /merchs

## Filtrar per idioma

var idioma = (agafar idioma)

\$.get("http://localhost:3000/activities?TranslationID="+idioma,function(data,status){});

### Es pot agafar

- De la taula merchs: MerchID, MerchName.
- De la taula merch\_translations: Price.
- De la taula **merch\_category\_translations:** CategoryName.
- De la taula merch\_images: ImageName.
- De la taula **merch\_sizes:** SizeName.
- De la taula **merch\_size\_details:** UnitsInStock.
